SUPERSILENT™

TEMPERATURE CONTROLLER

4.0A

Features:

Enviro-Sense™

Night-Pulse™

Fluid-Motion™

Perfect-Sine™

Optimized-Airflow™

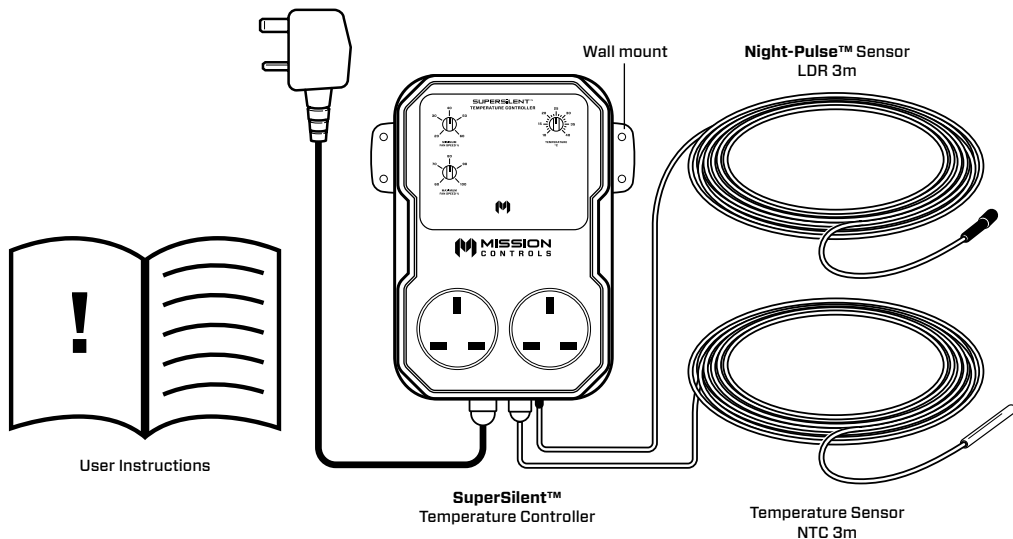

No-Humm™

- Controls up to 2 fans
- Ultra-silent & ultra-smooth fan speed control
- Energy efficient
- Kind on motors
- Integral Wall Mount
- Power Lead 3m
- 2 year warranty
- CE Certified

Setting up:

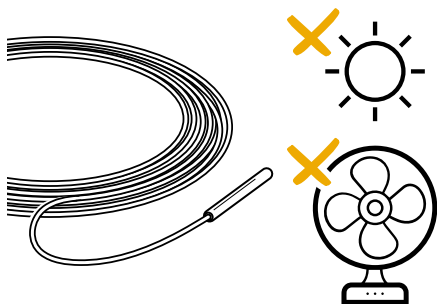

- 1** Plug **SuperSilent™** Temperature Controller into mains socket. Leave the mains power switched off until you have completed setup.

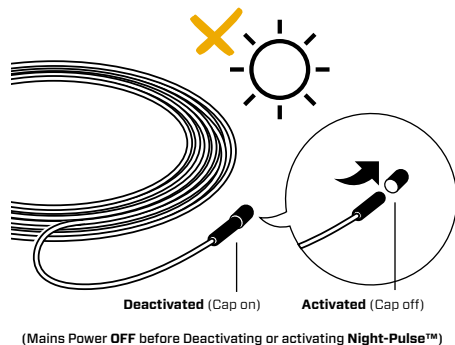

- 2** Plug input fan into socket 1, and outtake fan into socket 2.

- 3** Position Temperature Sensor inside room at canopy height, taking care to avoid places where it may take a false reading, such as directly under lights, or in front of fan.

- 4** Position **Night-Pulse™** sensor inside room where it can detect light. Do not put directly under light.

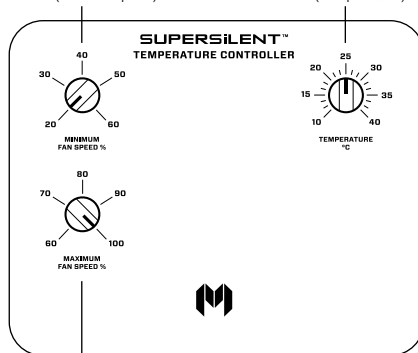

How to use:

- Set minimum fan speed on dial 1, set maximum fan speed on dial 2. Fans will work between these parameters. For the largest operating range, we recommend Min 20% and Max 100%.
- Set target temperature on dial 3.
- Night-Pulse™** Deactivated = Cap on. Activated = Cap off. Mains power must be off before activating or deactivating.
- Switch on at mains.
- Controller will enter a short period of calibration. During this time, fans may pulse up and down. After approximately 5 minutes, fans will find the right speed.

Dial 1 (Min Fan Speed)

Dial 3 (Temperature)

Dial 2 (Max Fan Speed)
